End Application:

C-5 aircraft engine

Nominallength:

10.000 inches

Product Name:

Pin press fixture

Nominalwidth:

5.300 inches

Nominalheight:

13.750 inches

Special Features:

Company item name-pinning fixture

Functional Description:

Used to press a pin into a shaft on the command housing assembly and on the pulley torque motor assemblies which are used on the engine pressure ratio indicator part no. 8dj370lwa1

Unpackaged Unit Weight:

37.000 pounds

Reference Data And Literature:

To 32a6-20-6-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
