End Application:

B-1b aircraft age.

Product Name:

Shaker motor test set

Functional Description:

Performs tests on horizontal stabilizer control linkage shaker motor at off-aircraft depot level of maintenance

Reference Data And Literature:

Serd no. 14b26c

General Description:

Three phase; 400.0 hz; 230.0/400.0 vac, not to exceed 100.0 volt-amperes per motor; 500.0 volts dc, not to exceed 10.0 milliamperes with terminals shorted; 1000.0 megohms motor winding; resistance check pin 5 to shaker feet and motor case not to exceed 0.0025 ohm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
