**End Application:**

F-101-ge-102 aircraft engine

**Nominal length:**

12.000 inches

**Nominal width:**

15.000 inches

**Nominal height:**

15.000 inches

**Special Features:**

Manufacturer suggested name - removal fixture, seal

**Functional Description:**

Used to pull seal from assembled rotor in horizontal position installed in rotor truck, or will pull seal from stage one disk subassembly in vertical position while disk is resting on work surface

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A505c0
