End Application:

B-1b aircraft age.

Test Item Connection Method:

Connector

Functional Description:

Interfaces test station and line replaceable unit for diagnostic testing

Supplementary Features:

Includes test program tape or disc; test program instruction with technical orders for testing shop replaceable units of power supply system

Fsc Application Data:

An/alq-161 radio frequency surveillance/electronic countermeasures subsystems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A537k0
