**End Application:**

F-4g aircraft age.

**Functional Description:**

Interfaces with pylon and navigational computer

**General Description:**

Approximately 30.000 ft lg with abuffer assembly about 1.000 ft from navigational computer; buffer assembly conditions +28 vdc release pulse to 5 vdc differential pulse

**Fsc Application Data:**

An/arn-101

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
