End Application:

F-109-ga-100 engine support equipment

Nominal length:

12.000 inches

Nominal width:

12.000 inches

Nominal height:

10.000 inches

Special Features:

Company item name-maintenance fixture, engine

Functional Description:

Required to support low pressure turbine rotating group in a vertical attitude on standard surface plate to determine runout accuracy of group during intermediate level maintenance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
