**Overall Length:**

18.000 inches

**Overall Height:**

8.000 inches

**Overall Width:**

18.000 inches

**Special Features:**

C/o heating controls and timers

**Functional Description:**

Used to heat various engine components to predetermined temperatures to expand the component material to allow for a slip fit, f109-hs-100 engine

**Reference Data And Literature:**

Serd 0031

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T276-d
