End Application:

F110-ge-100 engine

Nominallength:

23.130 inches

Nominalwidth:

6.000 inches

Special Features:

Mc/o steel plate, two vertical pins are welded to the plate to interface with the actuator mounting plate and a pin about 21.403 in. Away from these pins is welded onto a vertical block which is welded to the plate

Functional Description:

Used in support on the engine

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
