Overall Height:

8.000 inches

Overall Diameter:

16.000 inches

Special Features:

Circular configuration with insulated handles; company item name-heater

Functional Description:

Used to overcome the interference fit between the 5th stage compressor disk and 4th stage airseal

Reference Data And Literature:

T.O. 2j-f100-94; serd no. 6267; t.O. 33d4-6-511-1

Fsc Application Data:

F100-pw-100/200/220 engine

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T276-d
