End Application:

B1-b aircraft age.

Test Item Connection Method:

Connector

Functional Description:

Perform fault detection, fault isolation and repair verification of shop replaceable unit of the electronics display unit

Supplementary Features:

Includes software for testing low voltage power supply, low voltage ps inverter, circuit card assembly low voltage

Fsc Application Data:

Datsa-test station

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
