Overall Length:

21.350 inches

Overall Height:

14.070 inches

Overall Width:

15.500 inches

End Application:

B-1b aircraft age.

Functional Description:

Processes pressure vessel through various bake, evacuate and fill cycles during disassembly, testing, and reassembly; must interface with radar transmitter pressure vessel assembly

General Description:

821.350 in. Lg; 15.500 in. W; 14.070 in. H; c/o vacuum pump, electronic vacuum gauge, molecular-separator filter, vacuum hoses and valving, work surface, gross leak tester, oven, microprocessor based electronics package, electronic temperature gauge, indicators

Fsc Application Data:

Radar transmitter, an/alq164

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
