End Application:

B-1b aircraft age.

Test Item Connection Method:

Connector

Functional Description:

Performs fault detection, fault isolation and repair verification of shop replaceable units of control, countermeasures dispenser

Supplementary Features:

Includes software to test circuit card assemblies, sru no. 4 and 5

Fsc Application Data:

Datsa test system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
