End Application:

B-1b aircraft age.

Product Name:

Low pressure turbine balance shroud

Functional Description:

Used to reduce air turbulence effects on low pressure turbine rotor and protect operator from spinning rotor; supports stage 2 nozzle during balancing

General Description:

Cylindrical container 39.000 in. O/a dia; 9.000 in. Lg; 21.000 in. Id; sae 1020 steel; corrosion resistant paint

Fsc Application Data:

F101-ge-102 engine

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
