•
End Application:
F100-pw-100/200/220 engine main gear fuel pump assembly
Nominallength:
9.125 inches
Nominalheight:
8.500 inches
Special Features:
To name: fixture, differential pressure indicator subassembly
Functional Description:
Used to assemble/disassemble the differential pressure indicator
Reference Data And Literature:
Serd no. 4930; to 6j10-4-93-4
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No

Fiig: A505c0
