End Application:

B-b1 acft

Component Quantity:

3

Functional Description:

Used for fault isolation and performance verification of electromechanical power control assemblys

Reference Data And Literature:

Serd no. 42c88c

Supplementary Features:

MODI-FI-EDT-ONSN

Fsc Application Data:

Electrical multiplex subsystem

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
