Usage Design:

Aircraft hydraulic system

Installation Design:

Fixed or portable

Pressure Rating:

Between 0.0 pounds per square inch and 1200.0 pounds per square inch

Engine Driven Hydraulic Pump Testing Design Feature:

Not included

Special Features:

Used as a calibration standard for the fuel system components test station; 5.0 ft l, 3.0 ft w, 6.0 ft h, 1000.0 lbs; caster mounted

Functional Description:

Used to support the f100-pw-220 depot fuel accessory test station; it provides a unique set of mobile secondary calibration standard that simply hook up to any test station to facilitate auto recalibration

Reference Data And Literature:

Type designator e/42a; f-15/16

Fsc Application Data:

F100-pw-200 engine

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T361-e
