End Application:

F107-wr-101/400 turbofan engine

Product Name:

Test system, automatic integrated computer

Special Features:

C/computerized control room equipment; thrust stand in the test cell; equipment to prepare engine for test

Functional Description:

Oprovides means to dynamically test large numbers of engines; will measure, analyze and compare performance parameters, ensure operational readiness and identify specific corrective action requirements; known as icats

Reference Data And Literature:

Serd number 436

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
