End Application:

An/alq-17 (v) 2 countermeasures system

Product Name:

Antenna module test station

Special Features:

Consists of antenna module test set; antenna module holding fixture; cooling air supply; network analyzer; s-parameter test set (45.0mhz-26.5ghz) ; receiver alignment test set; synthesized sweeper; prom programmer; technical computer; mics cable assemblies and adapters; antenna aperture

Functional Description:

Fault isolate and repair of antenna array assembly; beam steering elec assembly; sum/delta pol w/g network; circulator assembly rec; circulator assembly fixed; 2 chanel down converter; phase shifter var if; bit limiter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
