End Application:

F-16 aircraft main landing gear drag brace assembly 2007000

Nominal length:

49.000 inches

Nominal width:

8.000 inches

Nominal height:

5.500 inches

Special Features:

To name: mlg drag brace assembly fixture

Functional Description:

Used for aligning and rigging the mlg drag brace

Reference Data And Literature:

To 4sa6-39-3; serd 13184

Relationship To Similar Equipment:

Used before incorporation of tcto 44h1-1-501; use 4920-01-456-7123 after tcto

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
