End Application:

Flight control system

Special Features:

C/o: crt, control panel, plotter, electric interface ports, power supply, hydraulic interface ports, universalservo valve test manifold

Functional Description:

Used to test many hydraulic servocylinder components of the spoiler panels, horizontal stabilizer, bending oscillating controls, rudders, stability and control augmentation subsystems, weapons bay door power drive unit, and flap/slat power control unit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T361-e
