End Application:

Turbofan engine, f112-wr-100

Product Name:

Air purge and pressurizing unit

Special Features:

C/o air motor pressure gage, vacuum pressure gage, reservoir level sight gages, purge unit control panel, unit access panel, fuel reservoir pressure gage, facility air supply pressure ge, fuel supply line and 3 vacuum drain lines

Functional Description:

Used to accomplish the tasks of purging, pressurization and effective filtering of water from the fuel system. The system will require the use of clean filtered jp-10 fuel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
