**End Application:**

Turbofan engine, f112-wr-100

**Product Name:**

Air purge and pressurizing unit

**Special Features:**

C/o air motor pressure gage, vacuum pressure gage, reservoir level sight gages, purge unit control panel, unit access panel, fuel reservoir pressure gage, facility air supply pressure ge, fuel supply line and 3 vacuum drain lines

**Functional Description:**

Used to accomplish the tasks of purging, pressurization and effective filtering of water from the fuel system. The system will require the use of clean filtered jp-10 fuel

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
