Overall Height:

20.000 inches

Overall Diameter:

28.000 inches

Functional Description:

Used to heat the 8th stage compressor so the bushing can be installed during repair/maintenance

Reference Data And Literature:

Serd 5607; t.O. 2j-f100-94

Supplementary Features:

Steel; a flat, round shaped device containing several electric heating elements that can be connected to an external power source

Fsc Application Data:

F100/200pw-220 engine ground support equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T276-d
