**End Application:**

F100-pw-229 turbofan eng

**Nominalheight:**

8.312 inches

**Nominaldiameter:**

6.060 inches

**Special Features:**

Steel; company item name-fixture air leak check, no. 1 bearing housing

**Functional Description:**

Used to check the air leakage between the carbon seal and the seal ring on the no. 1 bearing compartment and prior to installation into the inlet case

**Reference Data And Literature:**

T.O. 2j-f100-94; serd no. 5633; t.O 33d4-6-512-1

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
