End Application:
F100-pw-229 turbofan eng
Nominalheight:
8.312 inches
Nominaldiameter:
6.060 inches
Special Features:
Steel; company item name-fixture air leak check, no. 1 bearing housing
Functional Description:
Used to check the air leakage between the carbon seal and the seal ring on the no. 1 bearing compartment and prior to installation into the
inlet case
Reference Data And Literature:
T.O. 2j-f100-94; serd no. 5633; t.O 33d4-6-512-1
Shelf Life:
N/a
Unit Of Measure:
<del>-</del>
Demilitarization:
No
Fiig:
A505c0
