End Application:

C-130 awads

Joint Electronics Type Designation System Item Name:

Test station, radar, acft

Joint Electronics Type Designation System Item Type Number:

An/apm-464

Usage Design:

Adverse weather aerial delivery system

Special Features:

Operating power requirements: 115 vac; freq: 400 hz; 3 phase; power: 3500 watts; and voltage: 115 vac; freq: 60 hz; 3 phase; power: 4000 watts

Functional Description:

Provides stimulus/measurement capability to fault isolate a failed awads lru to sru level

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
