End Application:

C-17 electronic flight control system

Special Features:

Voltage 5 - 115 ac volts; 12 - 32volts dc; .05 - 10 ac/dc power consumption amperes; method of connection cable assemblies; automatic method of testing

Functional Description:

Test and verify operational performance of the automatic flight control system control panel

Reference Data And Literature:

To 8c3-16-14-8-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
