End Application:

4920-01-231-7956 test stand, automatic

Special Features:

Hot/cold fault diagnostics to single module level; expert system/artificial intelligence diagnostics; reduction in uut test time due to development of functional test before running performance test; elimination of unnecessary delays and serial processing; replacement of signal analyzer hardware with state-of-the-art device; new test reporting formats; new test data archival/retrieval; updated acceptance/rejection limits in uut atp and addition of service limits where available; replacement of obsolete hardware

Functional Description:

Used to automatically or manually perform the acceptance test for the f101-ge-102 and f110-ge-100 augmentor-fan-temperature (aft) controls for the f101 central integrated test system processor, and for the f110 ems (computer and processor) per technical manual

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
