**End Application:**

An/alq-161; b-1b aircraft age.

**Special Features:**

0c/o hv control panel, monitor control panel, main power control panel, equip rack, upper/lower hv power supply shelf, upper/lower hv interconnect panel, upper/lower current sense shelf, printed circuit board monitor assembly, and test chamber/cable kit

**Functional Description:**

Performs electrical tests and fault isolation of shop replaceable unit (sru) twt modulator p/n 150-027247-003

**Reference Data And Literature:**

Serd: 76v-82c

**Supplementary Features:**

Performs electrical tests/fault isolation on twt modulator

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T122-g
