End Application:

B-1b acft

Product Name:

Surface resistivity analysis test set

Special Features:

C/o a board and a probe with a means to connect the probe to a 500v megohmmeter; o/a dim. 24.000 in. Square with 12 holes thru, 0.500 in.

Dia; matl acrylic and laminate

Functional Description:

Used to test surface resistivity after application of fluoroelastomer rain erosion and antistatic coating on the leading edge horn assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
