Overall Length:

3.750 feet

Overall Height:

5.583 feet

Overall Width:

3.750 feet

Assembly Form:

Rigid

End Application:

F100-ge-129 aircraft engine

Work Holding Device Position Adjustability:

Nonadjustable

Functional Classification:

Gg-7.2

Functional Description:

Used to support lptr module during assembly/disassembly operations. Must also support stage 2 nozzle assembly in correct position relative to lptr assembly

Fsc Application Data:

B-1b aircraft age.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
