End Application:

F110-ge-100 engine

Nominallength:

11.750 inches

Nominalwidth:

2.000 inches

Special Features:

C/o precision ground disk

Functional Description:

Used to restrain the low pressure turbine nozzle forward air seal during inspection

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
