End Application:
F110-ge-100 engine
Nominallength:
11.750 inches
Nominalwidth:
2.000 inches
Special Features:
C/o precision ground disk
Functional Description:
Used to restrain the low pressure turbine nozzle forward air seal during inspection
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A505c0
