Special Features:

C/osemi-automatic test station; control; stimulus; measurement; routing; interface; adaptor; fixture; the test console has three bay console; bay one c/o angle position indicator; resolver/synchro simulator; resolver/synchro bridge; digital analyzing voltmeter; ac power supply, 3 phase, 400 hz, elgar-model 1753 b; 1553 mux bus tester, loral model sba-100a; bay two c/o digital word generator, interface technology model 660 (tacan); calibrator, fluke model 5101b; system power control module 400 hz; 28 vdc power supply, hewlett packard model hp-6038a; power control module 60 hz; bay three c/o timer/counter, model hp 5316a; 20 bit serial word generator/receiver, singer model; mux coupler module, singer model; digital voltmeter, model hp 3456a; monitor module; signal input module; interface module; test adapter; fixture assembly; mechanical fixture; cable assembly; weight: 2000 lbs

Functional Description:

Used on the c-130h gunship

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
