**End Application:**

F110-ge-100 engine

**Nominallength:**

12.000 inches

**Product Name:**

Fixture set assembly, positioning-tub flanges, turbine frame

**Nominalwidth:**

12.000 inches

**Nominalheight:**

6.000 inches

**Special Features:**

C/o 2 brackets, 2 clamps on the brackets, 2 dowel pins

**Functional Description:**

Fixture is to position the replacement seal drain, oil supply, and scavenge tubes for brazing

**Unpackaged Unit Weight:**

15.000 pounds

**Reference Data And Literature:**

Serd no. 1504

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
