End Application:

Lantirn system for f-15e acft

Functional Description:

Used for electro/mechanical impedance test, forward prism rate, aft prism rate test, also optical tests required to enable resolver/potentiometer adjustment

General Description:

Forward prism rate: minus 10v to porm 10mv t0 plus 10v porm 10mv; aft prism rate: plus 10 v porm 10mv to minus 10v porm 10mv

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A23900
