**Overall Length:**

5.000 inches

**Overall Height:**

3.000 inches

**Overall Width:**

3.000 inches

**End Application:**

B-1b on-board operation ground equipment

**Test Item Connection Method:**

Electric cable

**Special Features:**

Special requirement of passive breakout adapter box; test points for measuring electric power; all electrical and mechanical interfaces to conduct the test

**Functional Description:**

Xused to interface between the molecular sieve oxygen generation system test set and the uut which allows standard test equipment to make necessary measurements of electric power consumed during operation of the concentratorassembly

**Material:**

Aluminum body

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A537k0
