End Application:

An/aaq-18 infrared detecting set

Nominal length:

60.000 inches

Nominal width:

38.000 inches

Nominal height:

48.000 inches

Special Features:

400.0 lbs. Nom

Functional Description:

Bused to hold and transport the ir receiver lru to the maintenance facility and provide a method of accurately aligning the ir receiver with the vertical collimator for testing during maintenance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
