Overall Length:

17.000 inches

Overall Height:

8.000 inches

Overall Width:

17.000 inches

End Application:

An/alq-13 (v)

Test Item Connection Method:

Connector

Special Features:

One holding fixture; 1 interface adapter panel; 1 adapter housing assembly; all required electrical, radio frequency, and video cabling; adapter housing ruggedized so that no damage occurs to exposed electrical connectors

Functional Description:

Provides all interface functions between the test set and the uut; electrical connections/proper termination and buffering; holding fixture provides securely mounting the uut/dissipating heat by providing for cooling air or heat sinks; electrical interface via an interface adapter panel

Fsc Application Data:

USEW-HE-NUU-TIS5

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
