Usage Design:

Microwave test station

Functional Classification:

Aa-9.4

Special Features:

C/o low/high frequency spectrum analyzers, analyzer interface, carrier noise test set, frequency synthesizer, fixed/pulsed low phase noise sources, phase/delay elements, and power supplies enclosed in two 56 in. High bays. A controller will be located on adjacent test stand

Functional Description:

Used to measure phase noise characteristics of following stalo srus: frequency synthesizer, reference oscillator

Reference Data And Literature:

To 33a1-12-1305-4

Fsc Application Data:

F-16 aircraft age.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
