End Application:

Test set, digital module; an/alm-206b

Test Item Connection Method:

Connector

Functional Classification:

Aa-12.11

Special Features:

Provides high voltage protection, signal buffering, conditioning, and proper impedance termination

Functional Description:

Used to test the an/alq-13 (v) sru time correlation unit

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
