End Application:

Test set, digital module, an/alm-206b

Test Item Connection Method:

Connector

Special Features:

Provides high voltage protection, signal buffering, conditioning, and proper impedance termination

Functional Description:

Used to test the techniques generator cca, an sru of the an/alq-13 (v) f-15 internal countermeasures set

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
