End Application:

4920-01-146-2233

Product Name:

Aircraft maintenance signal conditioner

Functional Description:

Supplies excitation voltage req'd for the engine mtd lube level sensor and the lube temperature sensor to be conditioned to provide a dc level signal for the test cell console system

Reference Number Differentiating Characteristics:

As differentiated by source control drawing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
