**End Application:**

4920-01-146-2233

**Product Name:**

Signal conditioner test equipment

**Functional Description:**

Provides excitation and signal conditioning for the slave engine mtd modulated carrier type turbine flowmeter which is used for measuring main engine fuel flow; signal will be proportional to fuel flow; is connected to a frequency-to-voltage converter for dc level signal

**Reference Data And Literature:**

Serd 523

**Reference Number Differentiating Characteristics:**

As diff by source contrl dwg

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
