End Application:

4920-01-146-2233

Product Name:

Signal conditioner test equipment

Functional Description:

Provides excitation and signal conditioning for the slave engine mtd modulated carrier type turbine flowmeter which is used for measuring main engine fuel flow; signal will be proportional to fuel flow; is connected to a frequency-to-voltage converter for dc level signal

Reference Data And Literature:

Serd 523

Reference Number Differentiating Characteristics:

As diff by source contrl dwg

Shelf Life:

N/a
