End Application:

F-16c/d aircraft

Product Name:

High pressure flow block

Functional Classification:

Jj-7.2

Special Features:

C/o housing; two adapter; one hose assembly; two tees; seamless tubing and mounting hardware; dim. 17.000 in. Lg; 22.000 in. W; 25.000 in. H; one 0 to 1000 psig inlet pressure gage and one 0 to 1000 psig proof pressure gage; facility requirements: 600 psig nitrogen at 1 scfm

Functional Description:

Used to perform a high pressure bleed leakage test on the converter / transducer; verification of leakage of less than 0.8 scfm with gaseous nitrogen supplied to the c/t

Reference Data And Literature:

Serd 41273

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
