End Application:

Used on part number 11222-1 and 11264-1, f-16c/d block 40 acft

Special Features:

Pressure gages 2, one read 0-30 psig and the other one 0-100 psig; pressure regulators 2; c/t control port and bleed air port connector hoses; air line adapter; a number 4 bulkhead fitting; a number 4 tee fitting, and interconnecting piping; dim. 16.000 in. Lg; 12.000 in. W; 22.000 in. H; facility requirements: 50 psig air, flow

Functional Description:

Used to adjust spring load on the converter/transducers; the adjustment must be made while applying 12.35 to 12.55 psig to the c/t control port and 43.75 to 44.25 psig to the bleed air port

Reference Data And Literature:

Serd-41272

Supplementary Features:

Company item name-test panel, spring adjustment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
