End Application:

F110-ge-100 engine

Functional Classification:

Gg-7.4

Special Features:

C/o a base plate and riser supporting an arbor

Functional Description:

Used to position the ignitor can and provide a reference datum for remachining the racetrack slot

Reference Data And Literature:

Serd 1594

Supplementary Features:

Dim's are 20.000 in. H, 10.000 in. W, 15.000 in. L; matl - steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
