Width:

18.000 inches

Depth:

12.000 inches

End Application:

C-17 acft

Test Type For Which Designed:

On board inert gas generating system, air separation sytem monitor assemblies

Functional Classification:

Aa-9.2

Functional Description:

Used to isolate faults in individual components of on board inert gas generating sys (obiggs) air separation system (ams) monitor assemblies

Height:

12.000 inches

Reference Data And Literature:

Serd 490054

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
