Aircraft Maintenance Fixture - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4920-01-324-4398

End Application:
B-1b acft
Special Features:
The holding fixture containing components to control, distribute and monitor the compressed air utilzed to cool the uut; c/o throttling valve;
flowmeter; plenum; temperature probe; seal; multimeter; mounting plate
Functional Description:
Used to fault isolate & verify the performance of the static inverter; used in the electrical power generationsubsystem on the b-1b acft
Reference Data And Literature:
Serd no 42d81c
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A505c0
